

Gentell Fastcare™

New technology for better wound care

Why wait for monthly wound care advice when you can now have Gentell Certified Wound Care Specialists 24/7?

The Gentell Fastcare System delivers 24-hour wound care expertise to improve recovery rates, reduce your wound ratio and lower your overall cost of operation.

Here's how it works:

- The Treatment Nurse captures images or video of the wound with the new Gentell Fastcare tablet.
- Encrypted images are sent via wifi or cellular network to secure Fastcare servers that route the data to Gentell Certified Wound Care Specialists who recommend a course of treatment.
- If the Treatment Nurse accepts the recommendation, Gentell ships a 30-day treatment supply within 24 hours.
- The Fastcare tablet also enables bedside teleconferencing with Gentell experts for special situations.

100% HIPAA Compliant

Gentell's published HIPAA policy is accredited by The Compliance Team, and Fastcare meets or exceeds HIPAA requirements for electronic systems including authentication, encryption, data integrity, access control, audit control and transmission security.

Gentell makes better products, too.

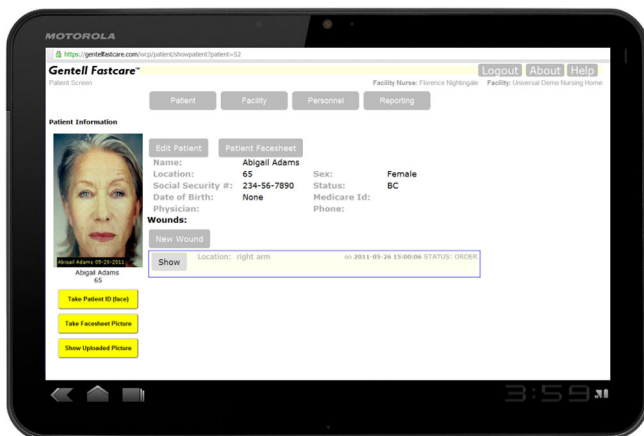

An early leader in Hydrogel, Gentell developed a complete line of superior wound and skin care products by listening closely to patients and nurses. For detailed product information, please see our videos and specification sheets at www.gentell.com

Capitation Plans & Part B Billing

Gentell's wound and skin care capitation programs can lower your operating costs and bring certainty to your wound care budget line. We can even handle all your Medicare Part B needs at no cost to you.

Gentell – making it better since 1994

A Tier 1, American manufacturer, Gentell has been making better products to manage wounds since 1994. We are now expanding from our home market in the northeast, and have opened a new 35,000 square foot plant in Bristol, PA. Our new plant, our national sales network and the Gentell Fastcare System will deliver advanced wound care anywhere you operate. For a more innovative and flexible approach to wound care, call Gentell today.

Ask your Gentell rep for a free Fastcare tablet for qualified facilities.
