

Gentell Educational Resources

Since 1994, Gentell's promise has been to "make it better" by helping to heal wounds and making better wound care products. With that comes a commitment to providing educational resources to our customers so that patients can benefit from the latest and best wound care treatments and products. Our suite of educational offerings include:

Wound Advisor

A comprehensive guide of wound care information that includes our wound management algorithm, treatment protocols, the latest NPUAP staging guideline, as well as information on all of our advanced wound care and skin care products.

Monthly Wound Care Insider Newsletter

A monthly publication focused on a single important wound care topic such as unusual skin conditions, lower leg wounds, delayed healing, and many more. Newsletters are available from your Gentell representative or can be downloaded from our website. For a complete list of topics, visit www.gentell.com/news.

In Service Presentations

Our wound care experts can provide in service education on a variety of topics. We can also develop custom presentations for your specific training needs. Some of our most popular topics are:

- Basics of Wound Assessment
- Assessing the Skin in Skilled Facilities
- 2016 National Pressure Ulcer Advisory Panel Staging Updates
- Skin Integrity and Wound Management
- Dressing Selection
- The Why of Pressure Injuries for CNAs
- Hand Hygiene to Prevent Healthcare-Associated Infections

Wound Education Center Handouts

Our Wound Education Center handouts are a go-to resource for specialty topics in wound care because they are succinct and informative with lots of reference photos. They can be used for staff training or as a reference tool. Our current topics include:

- Wound Assessment
- Management Guidelines for Lower Extremity Wounds
- Management Guidelines for Skin Tears
- Quantifying Wound Exudate
- "How to Use" handouts for different types of advanced wound care products: Collagens/Calcium Alginates/Hydrogels; Honey/Foam; Composites/Hydrocolloids/Films
- Preparing for a State Survey: Best Practices for Wound Care

Gentell leads the wound care industry in new product development and innovative cost-containment (capitation) programs for hospitals, nursing homes and home health agencies. For more information, call 800-840-9041 or visit our website at www.gentell.com
