

The Total Wound Care Solution

improves outcomes and reduces risk.

At Gentell, we make it better. We help close wounds and we make better products. Most facilities see a substantial reduction in wound rates within 90 days of converting to the Gentell Total Wound Care Solution.

Gentell manufactures a complete line of advanced wound and skin care products which are available through insurance billing* and capitation programs. Our Clinical Team provides wound consultation and on-site training each month. We offer documentation support including Fastcare, the first integrated wound care solution that provides quality improvement (QAPI) reports, facility reports, and timely information to ensure government compliance and the optimal operation of your facilities. And our Wound Advisor reference guide includes wound management protocols to help with treatment planning.

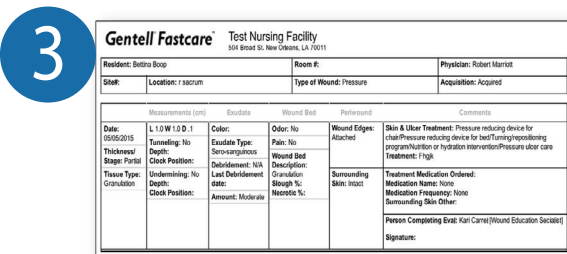

Gentell provides the Total Wound Care Solution.

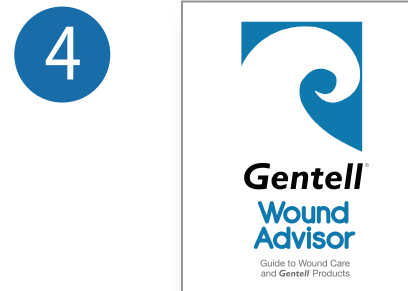

Advanced wound care products designed for nursing homes and made by Gentell

On-Site Clinical Consultants

Documentation training and support including our optional Fastcare F-314 compliant wound tracking system

Wound Advisor Reference Guide
